MARITIME CAPITALS
OF THE WORLD
2017**

MENON PUBLICATION NO. 201717

Is a leading maritime capital

=

Leading Maritime Innovation Centre?

**Leading
Maritime
Innovation
Centre**

**Leading
maritime
capital**

WORLD MARITIME TRAFFIC DURING ONE YEAR

A world map with a dark background, overlaid with a complex network of glowing blue lines and small yellow squares, representing global connectivity and data flow.

**CITIES COMPETE TO ATTRACT
THE MOST COMPETITIVE AND INNOVATIVE
MARITIME COMPANIES**

The image shows a world map with a network of light blue lines representing shipping routes. Two specific regions are highlighted with yellow circles: one in the North Atlantic region (around the British Isles and Scandinavia) and another in the East Asian region (around Japan and Korea). The text 'TWO CORE REGIONS' is overlaid in the center of the map.

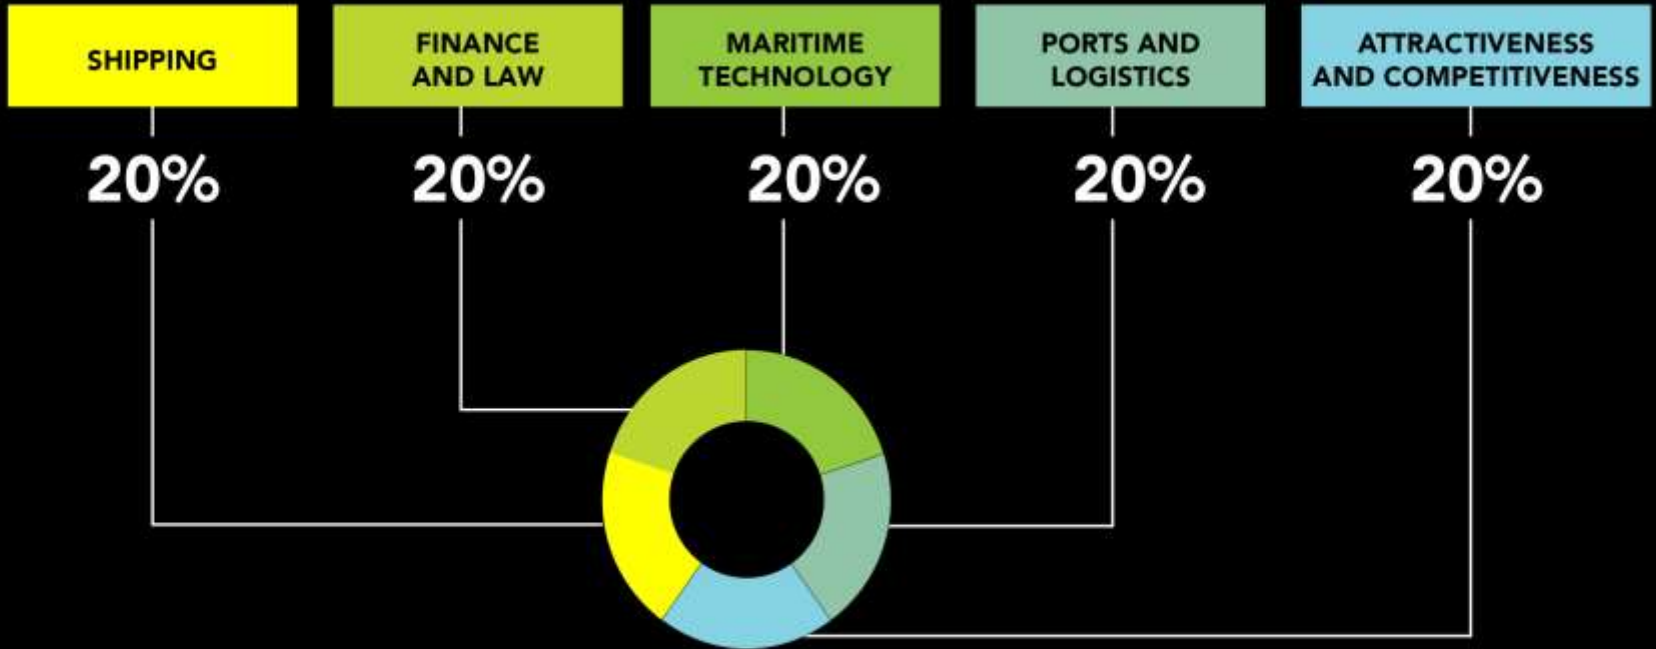

TWO CORE REGIONS

What is a leading maritime city?

1. A large and sophisticated shipping community – with owners, HQs and operation
2. A large port with varied and advanced logistics services
3. A specialised technological milieu, composed of yards, equipment producers, maritime R&D and innovative start-ups
4. Complete supply of specialised world-class services of finance, law and insurance

What are the drivers?

- Strategic location
- Favorable and stable political framework
- Transparent and efficient legal framework
- Proximity to large, demanding customers
- Local rivalry
- Large pool of talents
- Rich and open flow of knowledge and ideas
- Relationships based on **trust**
- Soft location factors

TOTAL RANKING

30

NOMINATED CITIES

Benchmarked on 24 objective indicators

- SINGAPORE
- TOKYO
- OSLO
- HAMBURG
- SHANGHAI
- ROTTERDAM
- LONDON
- HONG KONG
- NEW YORK
- DUBAI
- COPENHAGEN
- ATHENS
- BUSAN
- HOUSTON
- GUANGZHOU
- KUALA LUMPUR
- MUMBAI
- ANTWERP
- SYDNEY
- JAKARTA
- LOS ANGELES
- BERGEN
- ISTANBUL
- VANCOUVER
- KAOHSIUNG
- RIO DE JANEIRO
- LIMASSOL
- MANILA
- PANAMA CITY
- CAPE TOWN

APPENDIX A: LIST OF OBJECTIVE INDICATORS OF 30 CITIES

CITY	SHIPPING				FINANCE & LAW				PORTS AND LOGISTICS				MARITIME TECHNOLOGY		ATTRACTIVENESS AND COMPETITIVENESS									
	Number of container	Revenue (million USD)	Revenue (billion USD)	Number of ships/containers	Market share - shipping companies	Legal experts	Insurance companies	Maritime operations (seascope/shipoperator)	Shipping and ports	Number of maritime transportation	Port handling TEB	Port handling (TEU)	Port handling (TEU)	Port handling (TEU)	Port handling (TEU)	Port handling (TEU)	Port handling (TEU)							
SINGAPORE	4	2	2	4	13	2	5	-	10	3	3	3	4	5	7	6	12	7	1	1	5	4	26	1

LEADING MARITIME CITIES

Benchmarked on both objective indicators and Industry Expert assessments

1

SINGAPORE

2

HAMBURG

3

OSLO

4

SHANGHAI

5

LONDON

The experts' assessments of the policy framework in their own city.

(Cities ranked by the average score on the two indicators.)

Source: Menon (2017)

- Policy framework - overall assessment of taxes, subsidies and regulations (1=Highly unattractive; 4= Highly attractive)
- The government and governmental bodies are supportive of the maritime industry (1=Disagree; 4= Agree)

Expert opinion regarding the most attractive cities for relocating maritime companies

Number of experts that rank the cities among the three most attractive for different functions (HQ, Operations and R&D)

Source: Menon (2017)

- **Digitalisation**

- *Ability to apply and capitalize on existing technology – no limits*

- **Climate change and environmental problems**

- *Ability to develop, implement and scale-up solutions*

- **High growth and integration of ocean industries**

- *Ability to adapt to changes in solutions and growth patterns – flexibility pays off*

Industry experts answer to: “Looking forward five years from now, which cities will be the five leading maritime centers of the world?”

Source: Menon (2017)

Industry experts answer to: “Which cities have the strongest capabilities and are best positioned for the digital transformation of the maritime industry?”

Source: Lloyd’s (2015)

Does Singapore have the (dynamic) capabilities to retain its position?

- Ecosystem
- Trust & openness
- World class applied research
- World class education
- People with the right mindset
- Business models
- organisational models

Your employees' competence should be as tailormade as possible to the tasks that they shall execute – **as long as these are predictable**

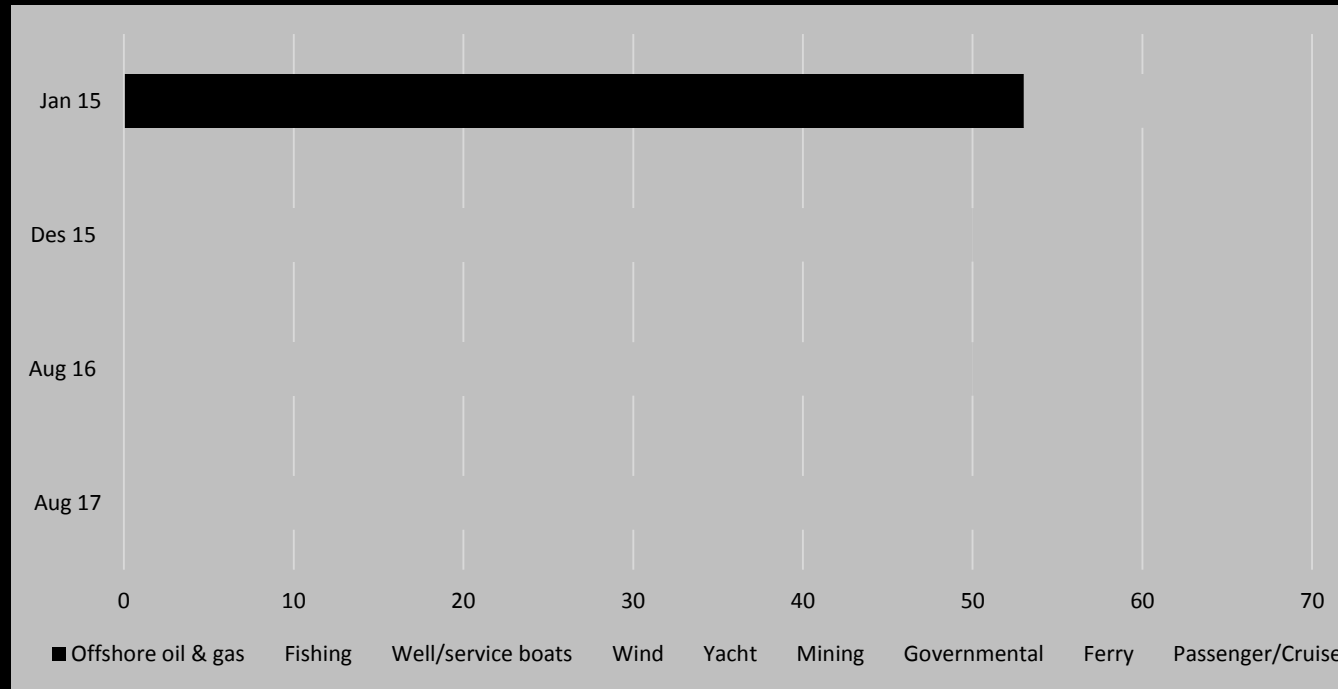

If students are uncertain about future demands for competence, they will go for generic studies.
Hence, **the strongest talents with generic education can outperform the specialists**

If students are uncertain about future demands for competence, they will go for generic studies.

**What is innovative today, will be
conventional tomorrow**

It is not Singapore's products and technologies that constitute your competitiveness,
but the capability to continuously create something new and better
– through collaboration in the ecosystem

Thank you for your attention!
